

UX Testing + UI Iteration

	User Interface: How could the styling of elements be changed to make a more visually appealing, clear, and space efficient layout? (ex: sizes, colors, fonts, alignment, etc.)	User Experience: What elements of the user experience could be improved to make the page more intuitive and more fun/satisfying? (ex: sounds, hover effects, press effects, etc.)
User 1 Name: Anthony Trejo	<ul style="list-style-type: none">• Remove the red color and change the text to white• Change font because it looks plain• Make the text center	<ul style="list-style-type: none">• Add a hover feature and a click feature• Add a sound by clicking the image• Add the theme for each of the image
User 2 Name: Jullian Villery	<ul style="list-style-type: none">• Change the red color to black• Change the text more into the center• Change the text font into spooky	<ul style="list-style-type: none">• Add some sound effects to the images• Add some hover effects• Add the changing size to smaller and darker for the image
User 3 Name: Allan	<ul style="list-style-type: none">• Change a new color for every image• Change the font• Make the text in the center	<ul style="list-style-type: none">• Add a hover effect• Add movie senses for two movies• Change the image optional
User 4 Name: Duncan	<ul style="list-style-type: none">• Chan• Change the text into the center• Change the main text to click the image for movie scene and information	<ul style="list-style-type: none">• Likes the layout• Can add a light while being click• Add sign to click the image
User 5 Name: Will M.	<ul style="list-style-type: none">• Maybe make text change color that coordinates with the movie• Make the text bigger• Add a more scary font	<ul style="list-style-type: none">• Play a sound from each movie when clicked on• Add a hover effect• Add a reset button

UI Before Feedback (Screenshot / GIF)

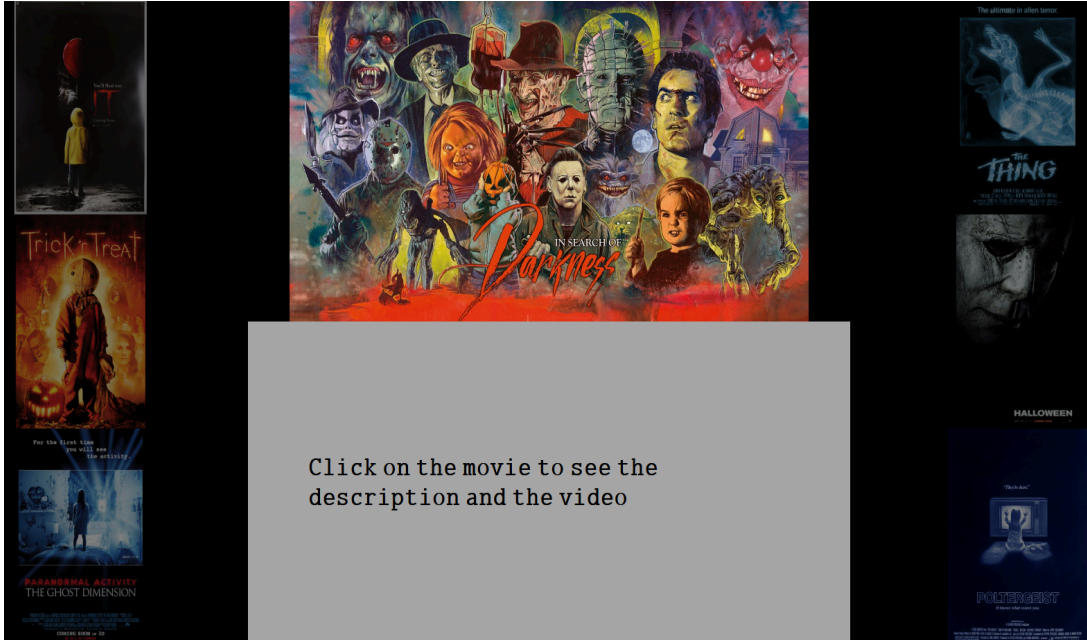

What trends did you identify in your feedback?

- Changing the color of the background to black
- Making the text into the center
- Changing the font
- Adding a hover effect
- Add light while the image is being clicked

UI After Feedback (Screenshot / GIF)

What changes did you make to improve your UI?

- I added the hover effects to the image while being clicked
- I change the color to black to make the theme horror
- I changed the font to make it look different and unique
- The image will get brighter while being clicked
- The text box is in the center of the web
